as of May 2015

Our service

- WIG Wire Rods are available in 5 kg tubulars
- Wire electrodes are available on basket spool SD 300
- Other delivery forms available on request
- Delivery with test certification 3.1
- Inspection certificate 3.2 possible for all classifications (TÜV, LRS, GL, DNV...)

Our spools obtain optimized cast and helix values ensuring smooth wire feeding in automated welding processes. Our welding consumables have tight tolerance ranges in alloying elements.

Please find further information about processing our alloys and material data sheets online on our website: www.vdm-metals.com

Your key benefits

- Short-term availability and controllable material purchasing
- Welding consumables complementing our plate portfolio
- Time saving by fast and flexible handling
- Technical know-how and material advice provided by our in-house welding laboratory

Delivery form: Wire rods in a length of 1,000 mm

as of May 2015

Delivery form: Welding strip in a width of 30 mm

Material No.	VDM Tradename	0.5 mm
2.4831	VDM® WS 625	•

The weight of the ring is 25–30 kg
as of May 2015

Delivery form: Welding strip in a width of 60 mm

Material No.	VDM Tradename	0.5 mm
2.4831	VDM® WS 625	•

The weight of the ring is 50–60 kg
as of May 2015
